

BEST PRACTICE- CONDUCT THE SOCIAL AWARENESS PROGRAM ON WATER CONSERVATION

Title of the Practice	Installation of the Practice
<p>a) Goal</p>	<p>The aim of organizing the Water Conservation Program was to spread awareness among students regarding the importance of water in our life. The objective of the Program was to encourage them to save water as it is the most essential element for the survival of any life form. The objective of the same was that students can convey the importance of saving water that they received from the program, to their family members & society. The Program was attended by 80 students and faculty members of the institution. Along with the discussion regarding awareness among people regarding water conservation.</p>
<p>b) The Content</p>	<p>A survey was conducted among 100 participants in the program. The survey was conducted using a structured and self-reported questionnaire; a multivariable logistic regression model was performed to determine the variables predicting awareness towards water conservation model in their house.</p>
<p>c) The Practice</p>	<p>The R.S.D Academy had made suggestion to their faculty members as well as College Students to implant water conservation model at their houses. R.S.D Academy also assist in implantation of these models without any charge.</p>
<p>d) Evidence of Success</p>	<ul style="list-style-type: none"> • The Program has been conducted by the R.S.D Academy. In this, the college welcomed all the students and faculty members. The agenda of the program was to convey the message of the importance of Water in our life. The college also spread a message for their family members regarding the awareness of conservation of water. • The college also focused on the several techniques that can be implemented for the conservation of water that has been discussed here careful use of water, do not wash down garbage, don't run the faucet to clean

	<p>vegetables, check for leaks, water the plant smartly.</p> <ul style="list-style-type: none"> • <u>The college also discussed about the best way to conserve water is to recycle and reuse it.</u>
e) Problems	<ul style="list-style-type: none"> • The basic problem while conducting the program was the lack of awareness of the students towards the water conservation activities. • Another problem was with the attendees as all the students did not join the program due to lack of information about the program.
